Attached is the form.....it has 2009 on it but we are still using it. Fill out the first page and on the second page put what years you are looking for and that all, we don't have to fill out the remainder until we request specific photos. Send it back to me and I will forward on to HQs.

Yes, we can try to HQ approach first. What do you need from me?

Or we can submit a request to my HQ person and he can see what they have access to. It doesn't cost to do that.

Lance –

Your call, just check with Lydia if the \$\$ are available (maybe when you meet with her?).

Is Wilcox located in LA? I have had a little luck getting some historical photos from DOT for free if they have them but just for LA. If you want to pursue checking on what Lockheed may have or have access to get, then of course I need you to fill out a form. Let me know if you want to do that.

Lance may need them for Wilcox Oil. For this purpose I'm sure Lydia would provide some enforcement money if Lance wanted to pursue this approach.

Hi Kevin.

That is an interesting question. We still have access to aerial photos but it is handled differently. I no longer had a budget for aerial photos, so funding will have to come from Carlene or

enforcement and to a person in HQs that does all the coordination. You can submit a request to see what historical photos that they may have or may be able to get. What site are you needing photos on?

Subject: Aerial Photo Analysis Contract

Hi LaDonna –

Is the Lockheed contract for aerial analysis still active, or is it finally done? If it's closed out, do you know of any alternatives for aerial photographs that are as old as possible (pre-1950s be best). Lance may have a need to obtain them.

Thanks

Kevin
